

# **Empire State Building**

**By Jalen**

If you go to New York City, you should go to the Empire State Building. The Empire State Building is for the whole family. Come visit this famous building.

The Empire State Building was built in 1939. The building has a lightning rod and antennae that make the building 1,454 meters tall. The Empire State Building has 102 floors!

Two people built the building in record time. It took them one year and forty-five days. It starred in a movie and became famous. Different colors light up on special holidays. These are the facts I learned in class.

If I go to New York City, I cannot miss the Empire State Building. It is a great place to go because there is a great view. I like how tall it is. I can't wait to go.

## **Brooklyn Bridge**

**By Damiona**

If you visit New York, you should go to the Brooklyn Bridge. There is a lot to do all year round.

Do you know where the location is? The Bridge connects Brooklyn to Manhattan. It was the longest suspension bridge in the world and an important landmark. In 1883, there were problems in New York with too much traffic to Manhattan and Brooklyn.

Do you know why people go there? People go there because it is a landmark with amazing architectural features. You can drive, walk, or bike across the bridge. It is always crowded.

You should go to the Brooklyn Bridge to see a better view of the nice water. If you are ever in New York City, you cannot miss Brooklyn Bridge. I can't wait to visit!
